Shaver Socket

The New Generation

PASSION is an internationally recognised and standardised plate switches and accessories. Crafted from ISI-approved, fire retarding urea formaldehyde.

Some of the exclusive features are its super smooth ivory finish, pure silver cadmium oxide contact tips, rocker operation, safety shutters, and Fuse equipped plugs.

All this is achieved through 100% indigenous technology, such as computerised designing, sophisticated toolroom, research and development, with full fledged laboratory to test products as per the relevant IS, and BS, standards.

Safety is our *Passion*

CPL Switches Private Limited

Manufacturers & Exporters of Electrical Goods Since 1947
