**PROJECT**

*The Blue Print of Quality and Economy*

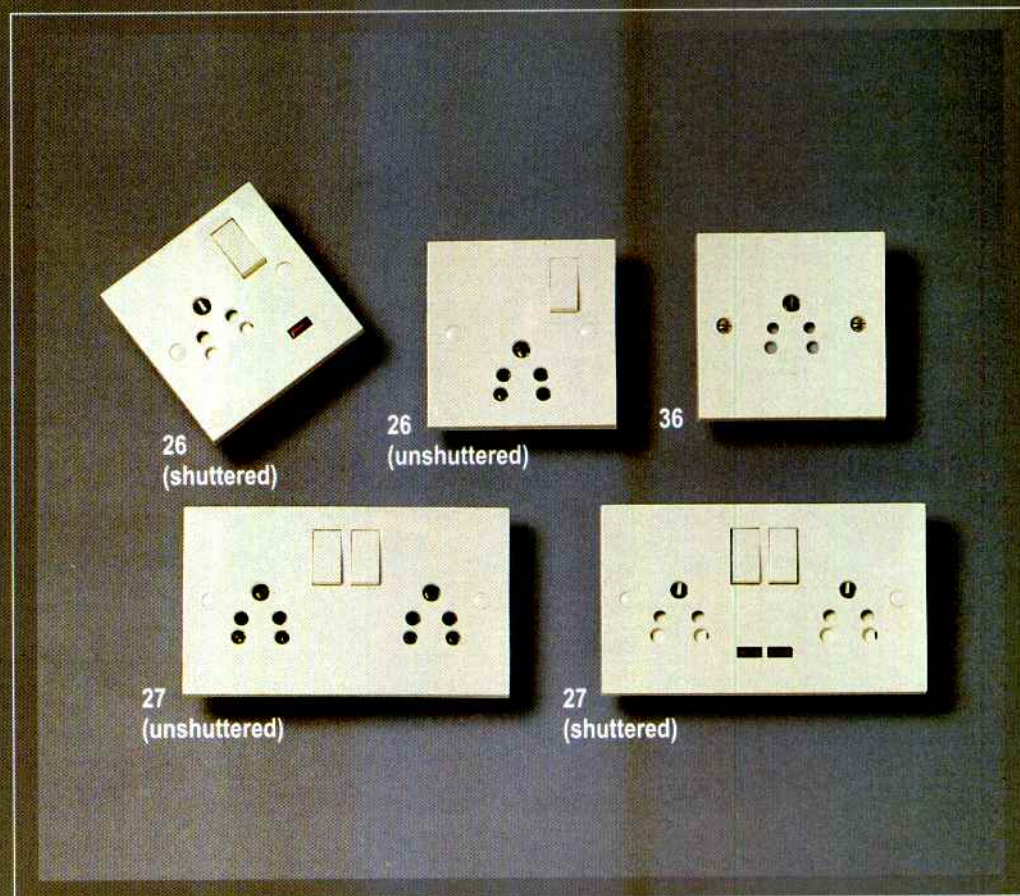

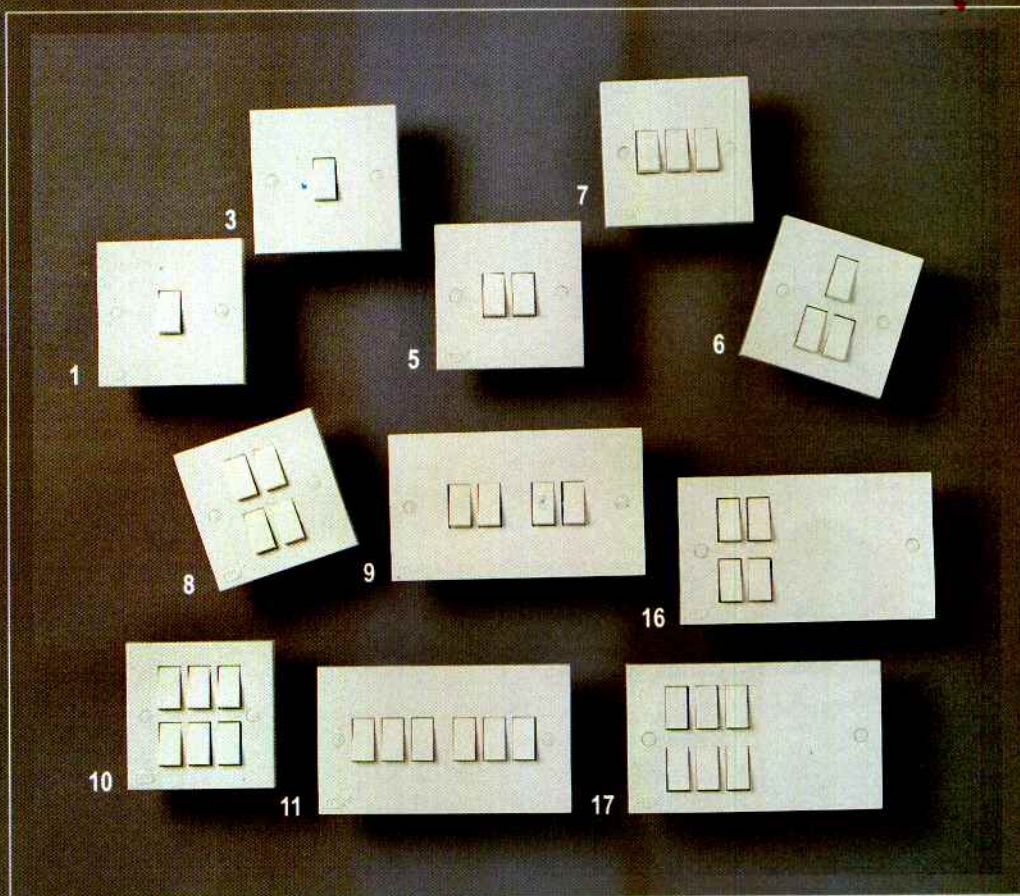

**CPL Project.**

One of the world's safest range of switches. Crafted from the world's most trusted, fire-retarding material : Urea Formaldehyde.

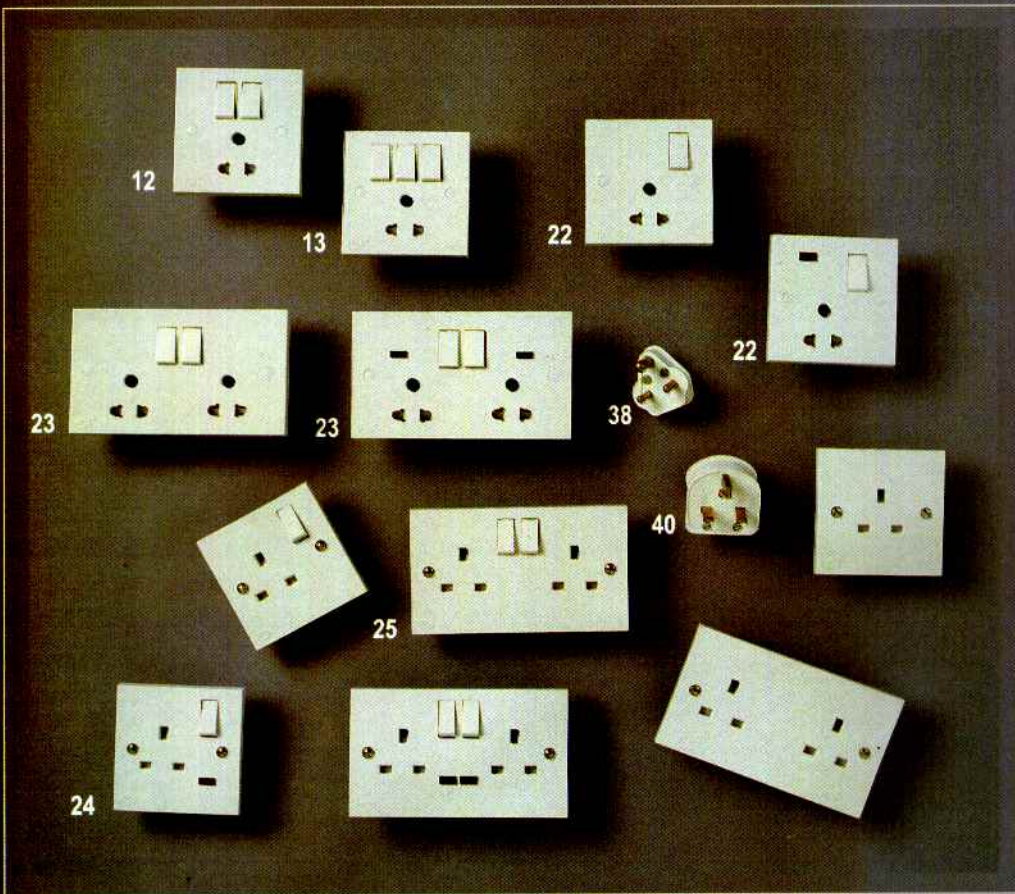

**Project** is a unique and complete range - designed using logical combinations of switches, sockets and dimmers for a practical approach towards 'on' and 'off' of life's endless chores that work on electricity.

Be it your lights, fans, air-conditioners, heaters, computers, televisions, microwaves, or that sweet little chime on your main door...

**Project** incorporates fuse-equipped plug tops, lamp holders, batten holders, TV antenna sockets,

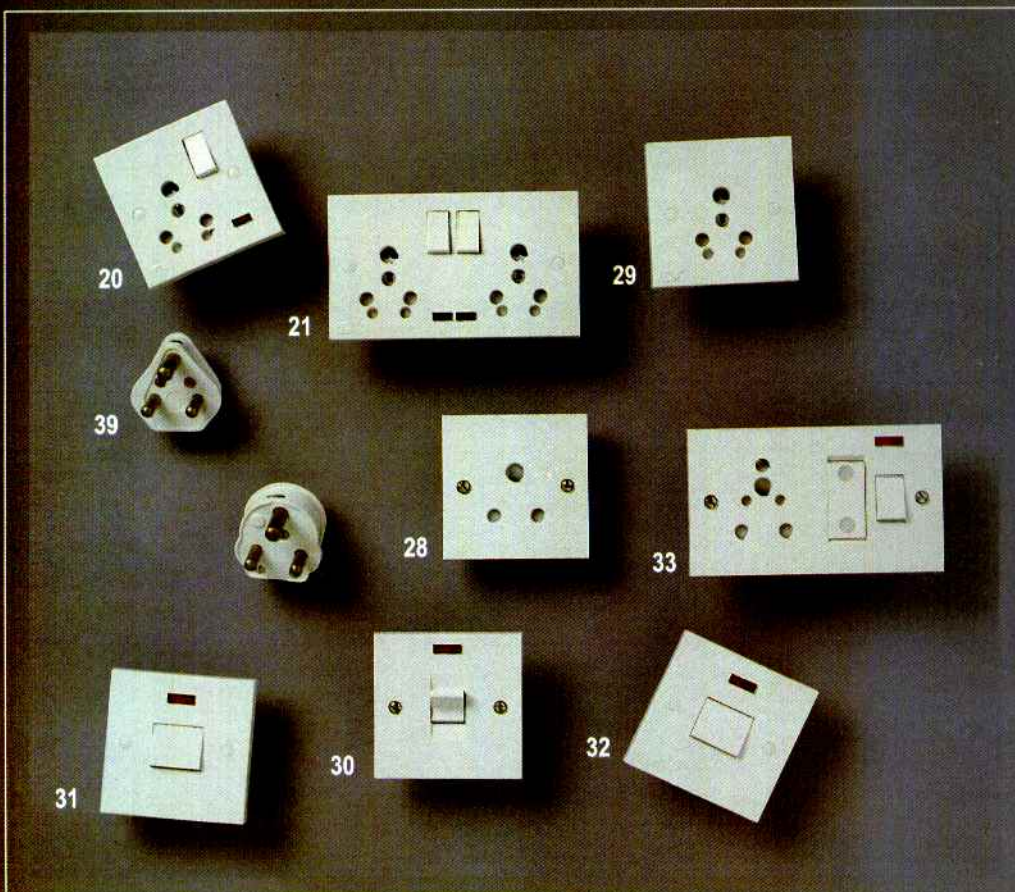

Jack-type telephone sockets and multiple switches that give you the convenience to operate your needs at the flick of a button.

While making things easier for the gamut of routine operations, the **Project** range ensures 100% safety. Behind the UF protection, is quality which you may never find in other cheap imitations. Pure brass terminals, silver cadmium oxide contacts, rocker operation, child-safe shutters, etc. The ISI mark of approval adds to the glory of **Project**.

And to make sure, you're getting **the original CPL**, always look for **the heart**. It beats for your safety!

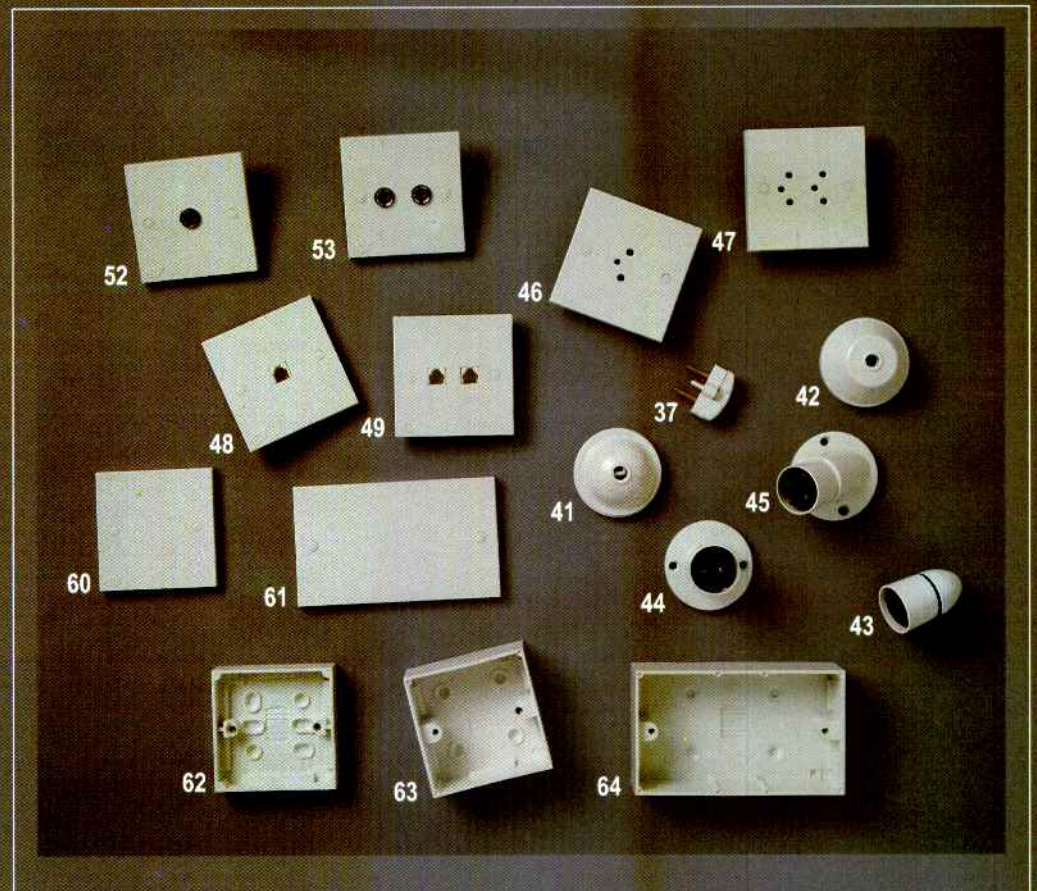

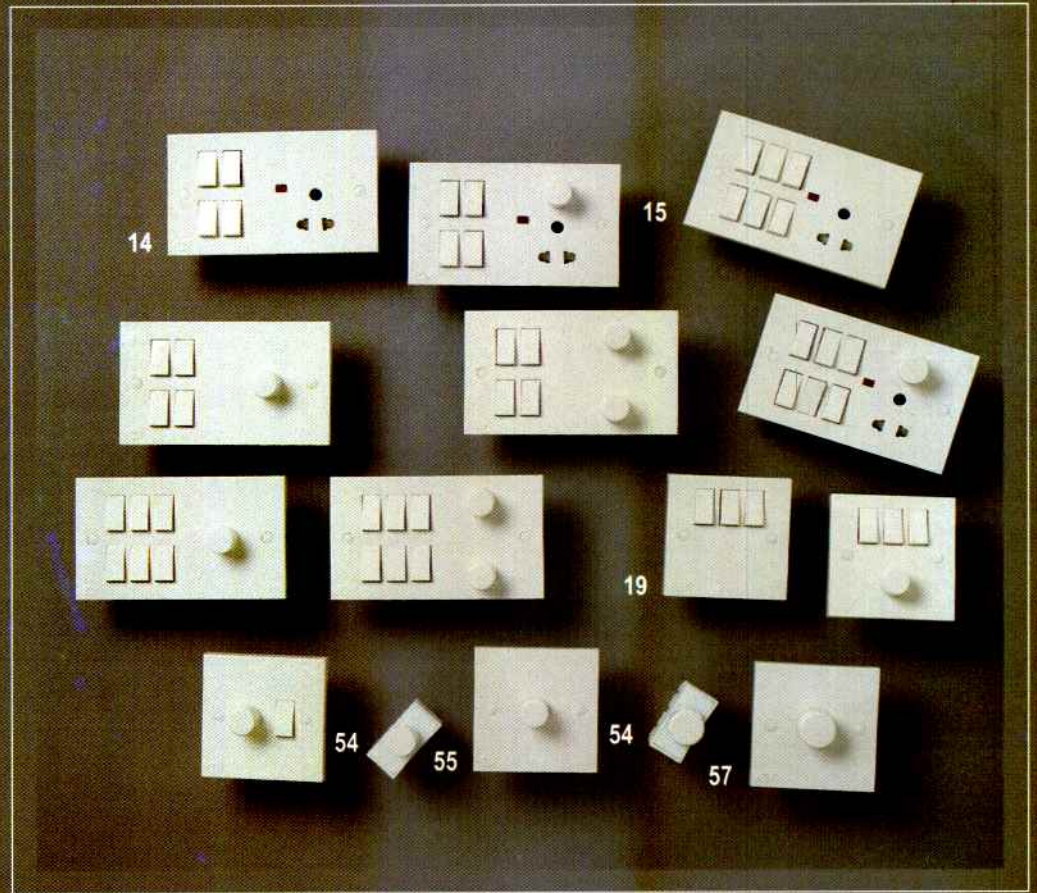

The **Project** Switches are ideal for important projects such as hotels, clubs, residential and commercial complexes, restaurants, schools, hospitals, auditoriums... Even offices, farm houses and homes.

Tested for fire-retarding properties at 850° C, the switches also pass a gruelling 40,000 on line, 'on-off' operations test.

Today, the switches play a silent role in the prestigious interiors of Oberoi Towers, Le Meridien, Taj President, The Leela, American Embassy, MTNL, Raj Bhavan, Eureka Forbes, Johnson & Johnson, L&T, Raymond, Bombay Hospital, Leelavati Hospital, Hiranandani Gardens, Raheja Vihar, Swami Narayan Temple, Willingdon Gymkhana and many, many more...
